

SCOTTSDALE INSTITUTE

2006

**PROGRAM
REPORT**

*Improving
Healthcare
Performance
Through
Information
Management
and Process
Improvement*

**The Healthcare Executive
Resource for Information
Management**

Scottsdale Institute is a not-for-profit corporation serving executive teams in leading healthcare systems who wish to share their experience in Information Management. We provide current coverage of strategic issues through teleconferences, conferences, publications and projects, consistently emphasizing open dialog, personal interaction and

networking. Virtual collaboration tools are being added in 2006.

SI programs are designed to promote education, idea sharing and networking. Experts, identified from members, sponsors, and other industry leaders present and facilitate discussions and provide insight into leading practices. We encourage members and guests to provide case studies, strategies for success, lessons learned, and research results.

PROGRAM SUMMARY

Teleconferences

- An efficient and effective way to provide education, information exchange and networking
- Practical, real time insights without the time and expense of travel
- Gives your entire organization interaction with top industry resources
- 65 teleconferences planned for 2006

Conference Meetings

- Spring Conference led by CEO members in Scottsdale AZ
- Fall Conference hosted by SI members, including site tours and demonstrations
- Interactive and informal: multi-disciplinary executive dialog and interpersonal networking

Publication and Communications

- Information Edge: our own review of hot topics, written for the busy executive
- Reports and articles contributed by Members, Sponsors, and other industry leaders
- "News Summary" and "Quality and P4P News": timely industry updates contributed by Founding Sponsor FCG

- Archives: materials and audio files from conferences, teleconferences, publications and projects

Projects and Collaboratives

- *Clinical System Implementation Collaborative*: members are sharing experiences in addressing medical, patient safety and quality issues when automating clinical processes.
- *Quality Improvement Collaborative*: download, complete and submit the template in order to share information and communicate with others regarding similar QI efforts.
- *IT Cost Benchmarking*: download, complete and submit the data collection form to receive comparisons and instructions for normalizing other organizations to yours.
- *Clinical Information System Benefits Measurement*: members are encouraged to review materials and contact SI for a password to participate.
- *Leadership Report on Healthcare IT Governance*: definitive research on evolving roles conducted by SI, HIMSS Analytics and Lawson.
- *Knowledge Management Collaborative*: Members shared experiences in using technology to support Clinical Decision Support, Virtual Collaboration and Best Practice Adoption.

2006 PROGRAM TOPICS

Ambulatory Care:

- System implementation in owned and private practices
- Documented cost and quality benefits
- Patient involvement and Personal Health Records
- Disease Registries and Management
- Consumer decision support

Electronic Health Records:

- Applications and technologies for clinical decision-making
- Clinical decision support governance
- Regulatory updates and industry trends
- Leading practices in evidence based care
- Community health collaboratives and RHIO's
- Physician leadership models

Emerging Technologies and Trends:

- IT and medical device convergence
- Imaging integration
- Wireless
- E-ICU implementation and benefits
- Communications technologies
- Telemedicine

IT Enabling Strategy and Operations

- MD Portals
- Service line management
- Predictive modeling
- Recruitment and retention solutions
- Productivity, staffing and scheduling
- Patient flow and capacity Management

IT Management and Value:

- Planning, leading, managing, and optimizing IT
- Measuring the impact of IT on operations and care
- Data and workflow standardization
- Optimizing infrastructure
- Culture and process changes for improved outcomes

- Successful implementation and achieving adoption
- Managing downtime and uptime
- Outsourcing options
- IT certification, standards and interoperability

Knowledge Management:

- Enabling the learning organization with tools, technologies and resources
- Use of KM in revenue cycle, supply chain, and care delivery
- Learning and Content Management Systems
- Virtual Collaboration tools

Patient Safety:

- Regulatory and consumer mandates
- CPOE, Bar Coding, and other advanced technologies
- Comprehensive safety program results
- Creating a culture of safety
- Workflow and systems redesign
- Reporting systems and approaches

Quality / Performance Improvement:

- Six Sigma and Lean Manufacturing case studies
- Approaches used by award winning health systems
- Pay for Performance
- Linking operations to Public Health and disaster preparedness
- Transparency and public reporting
- Demonstrating the IT/Quality link

Supply Chain:

- Strategic resource management and optimization
- Integration with patient flow
- Demand management tools and methodologies
- Bar Coding and RFID impact
