Randy Cox  
Chief Information Officer  
Ascension Information Services/St.Vincent Health

Randy Cox serves as chief information officer for St.Vincent Health. Randy has a strong record of success by strategically focusing on patient and provider-centered IT and superior customer service delivery. He has more than 25 years of experience in healthcare IT, as well as broad electronic health record experience with several industry-leading hospitals and practices.

Randy’s career has allowed him to help increase the quality and competitive advantage of a diverse set of prominent IT-focused healthcare institutions in the Indianapolis, Fort Wayne, and Nashville areas. Before joining St. Vincent, Randy served as system vice president and chief information officer at Saint Thomas Health in Nashville, TN. There, he authored and delivered the “One Patient One Chart” strategic roadmap and led Saint Thomas Health’s three acute care hospitals from Level 3 electronic health record maturity to Level 6.

Some notable accomplishments and professional honors include:

- COMPUTERWORLD Top 100 Organization for IT/Internet (1997, VA)
- 100 Most Wired Hospital (2003+, VA)
- Most Wired Most Improved Hospital (2006, Riverview)
- Meaningful Use Stages 1 and 2 achievement (2012-2014, St. Thomas)
- Becker's Top 100 CIOs to know list (2013, 2014)
- Becker’s 500 People to Know in Healthcare (2014)

Randy has an MBA in Healthcare Management, and has maintained his certification as a Certified Professional in Health Information Management Systems (CPHIMS) since 2002. Randy and his wife Angela have three daughters, and are members of Our Lady of Mount Carmel Catholic Church.
