Angie Curry

Angie joined CoxHealth in 2002 and serves as the Corporate CDI Manager over 12 clinicians that review 1,500 cases per month for the two-hospital system in Southwest Missouri. Additionally, she is responsible for working closely with physician leadership on education and training around documentation rules and guideline changes. Angie enjoys the fast paced, changing environment of healthcare documentation. She and her team are always seeking new ways to help healthcare providers efficiently and accurately create a compliant medical record. Recently, CoxHealth was the beta test site for Embedded CDI™. Angie earned her B.S. in Nursing at Missouri State University.
