

Marcus B. Shipley
Senior Vice President and Chief Information Officer

As Chief Information Officer, Marcus B. Shipley leads Trinity Information Services (TIS), providing direction and oversight for information technology that supports Trinity Health's strategic imperatives for improving quality of care, patient safety and financial performance. He is responsible for developing and implementing information system strategies across Trinity Health, one of the nation's largest Catholic health care systems. Shipley joined Trinity Health, which operates 49 hospitals and 432 clinics in 10 states and has revenues of about \$9 billion, in April 2012.

Prior to joining Trinity Health, Shipley worked for CIGNA, a health services organization, where he served most recently as Vice President Information Technology, IT Infrastructure and Operations. He joined CIGNA in 2008 as Vice President Information Technology, Architecture, Sourcing and Business Management.

Shipley's career spans 20 years in information technology across multiple industries, including 12 years in executive-level positions leading solution delivery, infrastructure services and enterprise architecture. He has served at Fidelity, where he was Chief Information Officer of its HR Services; Claims Desk Corporation, where he was Chief Technology Officer; and United Services Automobile Association, where he began his career as a programmer/systems analyst.

Shipley earned both an MBA and a BBA in Information Technology from the University of Texas at San Antonio.
